

THE SAFETY SPECIALISTS

LOW VOLTAGE RESCUE

UETTDRRF06B – Perform Rescue from a Live LV Panel

This Unit of Competency covers the performance of rescue procedures from live Low Voltage (LV) apparatus, not including overhead lines and underground cables in the work place. It specifies the mandatory requirements of rescue from a live LV panel and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for, health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

Pre Requisite

Any participants completing the Low Voltage Rescue training unit must also have completed Provide Cardiopulmonary Resuscitation HLTAID001 as a prerequisite to this course.

Course Outline

- ✓ Prepare to perform rescue procedures from live LV Panel
- ✓ Carry out rescue from live LV Panel
- ✓ Complete the LV panel rescue procedure

Assessment

Participants will be assessed via questionnaire and practical demonstration of skills. Participants with literacy/numeracy difficulties or physical conditions should speak with the Trainer to discuss alternative assessment approaches. Applicants will be required to undertake physical activity to meet all the assessment criteria to a satisfactory level.

Qualification

On successful completion, each participant will be issued with a Statement of Attainment.
